Gerindra Adi

Scarsdale, NY | 646-267-0184 | gerindraadi@gmail.com | linkedin.com/in/gerindra-adi | geribydesign.com

Education

University of Massachusetts Amherst **Graduated May 2026**
Manning College of Computer Sciences *Amherst, MA*
B.S. in Computer Science **GPA: 3.98**
Coursework: Scalable Web Systems (*React*), Web Programming (*TS*), Data Management (*MySQL, GraphQL*)

Experience

Founding Product Engineer **Sept. 2026 – Present**
SnapMatePhoto · marketplace connecting clients with local photographers *Seattle, WA (Remote)*

- **Designed the new homepage in Figma and built it**, iterating on designs with the team and taking the responsive mobile and desktop layouts from design to production
- Raised desktop Lighthouse scores from **66 to 95 for performance, 85 to 97 for accessibility, and 92 to 100 for SEO** via pre-loading techniques, CDN configuration, intentional HTML structuring
- **Shipped SEO-friendly URLs to production**: clean routing for profiles and search, duplicate-safe slugs, a 347-profile backfill, legacy-link redirects, and a 1,800+ URL sitemap
- **Fixed the root cause of recurring outages on AWS EC2** that took down admin, logins, and uploads; ran the homepage launch with database backups, and a tagged rollback path
- **Established engineering standards for future developers**: a Codeception test suite, a CI/CD pipeline, task specs with acceptance checklists, and pull request reviews
- **Leading the modernization of a legacy MVP inherited from a previous team**: reworking user flows and driving an incremental migration from ThinkPHP to Laravel and React
- **Set up GA4 analytics**: landing-to-search conversion rose from **17.8% to 20.4%** in the homepage's first week, and seasonal demand data now drives photographer reranking

Full Stack Engineer Intern **July 2026 – Sept. 2026**
SnapMatePhoto *Seattle, WA (Remote)*

- **Audited the full booking lifecycle** as both client and photographer: access control, payment validation, race conditions, and email triggers (the basis for SMS notifications)
- **Built a headless CMS layer on Sanity** for the hero, reviews, and social feed, with server-side caching and fallback content, so non-technical staff can ship content without a deploy
- **Created the company's first design system** after auditing inconsistent and competing brand colors, typefaces, and type sizes, and designed responsive mobile and desktop layouts

Undergraduate Course Assistant **Sept. 2024 – May 2026**
University of Massachusetts Amherst *Amherst, MA*

- Supported **220+ students** across Scalable Web Systems (React, Docker, CI/CD, AWS S3) and Intro to Computer Systems (C, GDB): ran office hours, reviewed pull requests, and graded 150+ exams

Projects

Timeline *TypeScript, React, Node.js, Express, Prisma, PostgreSQL* **Feb. 2025 - Present**

- **Multimedia life-journaling app.** Took over a four-person class project as sole developer and run it in production: GSAP animations, Google OAuth 2.0, JWT sessions, client-side end-to-end encryption, and S3 presigned uploads

Leadership

Co-Founder & President, UMass Indonesian Student Association **Sept. 2024 – May 2025**

- Led a **15-member** team running five events a semester; secured **$1,500** in sponsorships through proposals and pitches to vendors and sponsors

Technical skills

Languages: TypeScript, JavaScript, PHP, SQL, Python, Java, C
Web & Backend: React, Node.js, Express, GA4, Prisma, PostgreSQL, MySQL, Sanity CMS
Infrastructure & Testing: AWS (EC2, S3), nginx, Docker, Linux, CI/CD, Codeception
AI & Design: OpenAI and Anthropic APIs, Claude, Codex, GitHub Copilot, Figma, design systems
